GATOR™ GX ELECTRIC

Your Punch List Sidekick.

Go electric and knock out all those to-dos — without all of the noise, fuss, or hassle of fuel. The GX delivers reliable performance that's perfect for light-duty jobs around your property. Haul tools, gear, or garden loads in a versatile cargo box, and stash essentials in storage spaces all over the vehicle. It's narrow enough to glide through tight spaces, but tough enough to handle hard work. Plug it into any standard 120V grounded outlet with its convenient on-board charger, and take charge of your day.

Cargo box can hold a variety of tools, equipment, and materials. Available as a manual dump lift.

Compact frame delivers easy maneuverability—ideal for tight spaces and narrow paths.

Ample storage on the dashboard, under the hood, and below the seats keeps all your essentials secure.

GATOR™ GX ELECTRIC CREW

Carry the Crew. And Everything Else You Need, Too.

The GX Crew adds two extra rear-facing seats and expanded storage, making it the perfect utility vehicle for moving your crew, your tools, and your day forward. Same ultra-quiet, all-electric performance as the GX. Same charge-from-anywhere convenience. Bring the comfort. Leave the gas behind.

Attachment upgrades, including side mirrors, lights, JDLink™ connectivity,¹ and more, let you customize your ride and enhance functionality.²

Extended canopy and optional split windshield provide protection from sun and rain.

Roomy design features four seats and the ability to fold down rear-facing seats for additional cargo space.

¹You can turn on JDLink connected service in your John Deere Operations Center account for free. JDLink requires a cellular connection to transfer information from machine to Operations Center. Consult your John Deere Dealer for coverage availability.

²Actual performance may vary based on equipment and environmental conditions, and attachment usage. Features, specs, and attachments subject to change without notice. Before operating or riding, always refer to the safety and operating information on the vehicle, and in the Operator's Manual.
